This map is for general location purposes only and only at the published scale. This map has no official status and may not be reproduced without expressed written permission. Distances listed are approximate and were collected by bicycle outfitted with an electronic computer and two GPS units. The distances were then verified in GPS TrackMaker mapping software. Elevation change was taken into account for distances. USGS DOQQ photos were also used for verification of terrain features and buildings. The final map was created using Intergraph's GeoMedia Professional. Data collected by Joe Prusaitis and Chris Matus. Map prepared by Chris Matus. Copyright © 2005 Chris Matus
